

When the Radiation Oncologist has deemed that the patient is ready to receive their first radiation treatment it should occur within 28 days.

**Definition:** The number of patients who received their first treatment within 28 days of being ready to treat proportionate to the number of patients who received their first treatment.

**2017/18 Target:** 100%

**Analysis:** We are tracking very positively with attaining 100% on this target. Of note we did have a slight 1% drop in 2016/17 due to increased volumes and some equipment challenges however are back on target for 2017/18 fiscal.
