Health and Wellness Priorities

	Improve access to local primary care providers and support services for all community members.		Better support the mental health needs of children, youth, and adults living in OSA.
	Enhance public awareness of local programs and services that promote and support health and wellbeing.		Address the lack of affordable, reliable transportation services in OSA.
	Support rural communities and improve access to health services, programs, and supports in rural areas.		Sustainably strengthen current efforts addressing community and household food security.
	Better support families who are struggling with day-to-day demands and expectations.		Improve communication and collaboration between local and regional services and programs.
	Address mental resiliency in youth living in OSA and improve their coping skills.		Address the current understanding and belief system around cannabis use and how it impacts children and youth.
